

ALFONZO ANTHONY

AI PROMPT ENGINEER | AI AUTOMATION ENGINEER | AI PRODUCT DEVELOPER

United States | Open to Global Remote Work | Email: contact@alfonzoanthony.com | ailabs.alfonzoanthony.com

PROFESSIONAL SUMMARY

AI Prompt Engineer and automation builder with 20+ years of experience spanning advanced technical support, customer operations, UX design, troubleshooting, and digital product development. Builds structured prompt systems, n8n workflows, and AI-assisted applications using ChatGPT, Claude, and Gemini. Strong at translating ambiguous requirements into clear instructions, predictable outputs, repeatable workflows, and user-centered products. Combines hands-on AI automation with deep diagnostic and documentation experience from AT&T, where complex technical issues, peer support, escalation handling, and process improvement have been central to the role since 2015.

CORE AI & TECHNICAL SKILLS

PROMPT ENGINEERING

Prompt architecture; context design; structured outputs; prompt chaining; output evaluation; iterative refinement; responsible AI

AI & AUTOMATION

n8n; ChatGPT; Claude; Gemini; LLM workflows; webhooks; Google Sheets; Meta Ads workflow automation

PRODUCT & UX

User research; wireframes; prototyping; usability testing; information architecture; Figma; Adobe Creative Cloud

AI-ASSISTED DEVELOPMENT

Python; TypeScript; Next.js; desktop/web application concepts; API integrations; data mapping

TECHNICAL SYSTEMS

Windows; macOS; Linux; networking; hardware; remote access; RSA authentication; technical troubleshooting

CUSTOMER OPERATIONS

Salesforce; Oracle CRM; FCR; VOC; de-escalation; retention; peer coaching; process documentation

SELECTED AI & AUTOMATION PROJECTS

2TimesACharm AI Ad Engine | n8n | Meta Ads | Generative AI | Webhooks | Google Sheets

- Designed and built an end-to-end n8n advertising workflow that generates campaign content, creates Meta campaign assets, logs data, captures leads, and triggers automated follow-up sequences.
- Live-tested this specific engine with one Meta awareness campaign that reached 16,653 people on \$26.53 in ad spend, at \$1.59 per 1,000 people reached.

AI Video Generation Engine | n8n | Google Gemini | Structured Output | Generative Video

- Built a separate n8n pipeline that uses Gemini to generate video scripts, validates the response through a Structured Output Parser, and passes machine-readable output into video generation.
- Designed prompts for downstream reliability so AI responses function as workflow data rather than isolated text.

Crusoe RipPro Studio | AI-Assisted Desktop Software | DTF/DTG Print Workflow

- Created a streamlined print-preparation application through prompt-driven AI development, centralizing artwork intake, print queues, media presets, printer setup, calibration, hot folders, job history, and settings.
- Applied UX thinking and domain knowledge to reduce fragmented setup and repetitive production tasks for DTF/DTG and specialty-media workflows.

Mockup Magic | Generative AI | E-Commerce Product | UX/UI

- Designed an AI-assisted product-content platform for clothing brands, print shops, and e-commerce sellers, combining realistic apparel mockups, fictional AI lifestyle models, advertising content, and organized exports.
- Structured the product around a continuous workflow from artwork to mockup, lifestyle creative, advertising asset, and marketplace-ready output.

PROFESSIONAL EXPERIENCE

AI Automation, Web & Product Builder | Independent | 2025-Present

- Builds AI-assisted workflows and product concepts using ChatGPT, Claude, Gemini, n8n, and related tools to streamline business, marketing, creative, and production processes.
- Designs user-centered digital experiences using UX research, wireframing, prototyping, usability thinking, and visual design principles.
- Builds and manages WordPress/Hostinger websites, e-commerce and affiliate projects, and practical AI-assisted software prototypes.

Technical Support, Retention & Peer Support | AT&T | 2015-Present | *career progression across support and customer operations*

- Provides advanced support across mobile/device troubleshooting, networks, applications, account systems, CRM navigation, retention, and escalated customer situations.
- Selected as an MI60 peer escalation resource after earning an advanced Android Master Certification; assists representatives and managers with complex technical, system, and customer problems in real time.
- Supported teams across Texas, Louisiana, Florida, and Mississippi and has served as a primary department support resource when managers were unavailable.
- Identified a recurring RSA token/registry failure during the work-from-home transition and rewrote the remote-access and token-registration procedure used to restore employee access.
- Rewrote an inaccurate departmental call flow and coached new hires and tenured representatives on troubleshooting, CRM usage, de-escalation, sales, retention, and performance improvement.

Lead Technical Mentor | DirecTV Account | 2009-2014

- Promoted after maintaining an approximately 0.3% unnecessary truck-roll rate, the lowest in the center; coached new hires and underperforming representatives toward required metrics.
- Used call review, troubleshooting analysis, one-on-one coaching, and performance metrics to improve technical accuracy and first-contact resolution.

Service Technician | Cross Computer Repair | 2005-2008

- Diagnosed and repaired desktops, printers, motherboards, storage devices, operating-system failures, and other hardware/software issues; performed onsite service, OS reinstalls, data recovery, and hardware replacement.

Technical Support Specialist & Sales Trainer | Gateway Computers | 2001-2005

- Delivered high-volume technical support and achieved a 46% sales close rate, the highest in the call center; elevated to trainer for consultative selling within technical-support conversations.
